## Presents the COMMERCIAL CARPET RESTORATION SYSTEM

**Commercial Carpet must be both maintained and restored** to best serve *your* investment and *the carpet's* useful life. Prudent stewardship! The company willing to implement a system which both maintains and restores its carpet floor coverings will enjoy these benefits:

- ***A clean environment*** -- the result of reduction of soils, cleaning residues, and air pollutants
- ***A healthy environment*** -- the result of improved employee and customer health
- ***A productive environment*** -- the result of employees not worrying over health issues
- ***A pleasant environment*** -- the result of employees and customers who enjoy fresh surroundings to work and do business in
- ***A profitable environment*** -- the result of 1) extended carpet replacement cycles, 2) fulfilled and loyal employees working hard without distraction, and 3) "retained" and "referring" customers who enjoy the experience of **doing business in a clean, healthy, productive, and pleasant office**

Today's commercial carpeting is made up largely of a fiber that is economical to install, yet is susceptible to **matting, burning distortion, and tenacious soil-retention and re-soiling**, especially in oil-prone service areas. A business owner needs **knowledgeable carpet specialists** to **address such issues**, and demonstrate competent resolution of these problems.

The **COMMERCIAL CARPET RESTORATION SYSTEM** is a special feature of our company intended to provide the solutions needed for today's commercial carpeting problems. The program has and can involve any or all of the following service options:

- ***Analysis*** of floor usage and present floor covering
- ***Specification*** of recommended floor coverings for each use area
- ***Technical recommendation*** for any needed replacement areas
- ***Implementation*** of "the system" of floor maintenance required:
  - A ***FIRST VISIT*** restoration including dry-soil removal, spotting, preconditioning, and restoration extraction.
  - A ***FOLLOW-UP PROGRAM*** specifying maintenance of low, medium, and high-traffic areas to include, with varied frequency: 1) multi-pass vacuuming; 2) "bonneting" with spotting- - a low-moisture process with encapsulating detergents for carpet fiber cleaning that keeps a highly acceptable appearance level; 3) speed drying preparations for swift return of surfaces to use
- ***Evaluation*** of service program with prompt communication and response access

**GLORY Carpet Cleaning Service** is a division of **GLORY Cleaning Service** which has provided janitorial excellence with dependability and quality for Connecticut businesses since 1987. Use of trained technicians for all specialized carpet cleaning is company policy. A full line of insurance has been in place since our beginning with references. We are full members of the **Institute of Inspection, Cleaning, and Restoration Certification [IICRC]**. We cordially invite inquiries, and pledge a loyal interest in serving your needs with the

**COMMERCIAL CARPET RESTORATION SYSTEM.**
